

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-18 (canceled).

Claim 19 (withdrawn): An electronic ticket information distribution store terminal for distributing electronic ticket information which authenticates a right to attend an event, wherein the electronic ticket information distribution store terminal receives a request to distribute the electronic ticket information concerning a plurality of electronic tickets for the event from a user of an information storage chip, transfers the request to an electronic ticket distribution authentication apparatus so as to instruct the electronic ticket distribution authentication apparatus to perform distribution authentication processing for determining whether the electronic ticket information is to be distributed to the user, receives a ticket issuing request from an electronic ticket platform center for managing the distribution of the electronic ticket information, and writes the electronic ticket information for a plurality of electronic tickets for the event into the information storage chip, wherein at least one of the plurality of electronic tickets are structured in a format that allows the at least one ticket to be assigned from the information storage chip to at least one other information storage chip using the electronic ticket platform center.

Claim 20 (withdrawn): An electronic ticket information distribution store terminal according to claim 19, wherein output means is provided for outputting the electronic ticket information as a paper ticket.

Claim 21-28 (canceled).

Claim 29 (currently amended): An electronic ticket management method ~~employing: an event organizer apparatus for planning an event, an electronic ticket distribution authentication apparatus for distributing electronic ticket information which authenticates a right to attend the event, an information storage chip for storing the electronic ticket information, and an electronic ticket platform center for managing the distribution of the electronic ticket information, the electronic ticket management method comprising:~~

- (a) providing:
 - (i) an event organizer apparatus;
 - (ii) an electronic ticket platform center; and
 - (iii) an electronic ticket distribution authentication apparatus;
- (b) causing the event organizer apparatus to form forming event information unique to an the event;
- (c) causing the event organizer apparatus to form forming seller information authorizing the electronic ticket distribution authentication apparatus to sell electronic tickets to the event;
- (d) causing the event organizer apparatus to register registering the event information and the seller information in the electronic ticket platform center; by the event organizer apparatus;
- (e) causing the electronic ticket distribution authentication apparatus to receive receiving a request to distribute the electronic ticket information concerning a plurality of electronic tickets for the event from a user of an the information storage chip;
- (f) causing the electronic ticket distribution authentication apparatus to determine performing distribution authentication processing for determining whether the electronic ticket information is to be distributed to the user by performing distribution authentication processing;
- (g) causing the electronic ticket distribution authentication apparatus to register registering an authentication result in the electronic ticket platform center as ticket issuing information; by the electronic ticket distribution authentication apparatus;

- (h) ~~causing the electronic ticket platform center to form forming~~ an electronic ticket information master based on the event information registered by the event organizer apparatus;
- (i) ~~causing the electronic ticket platform center to relate relating~~ the ticket issuing information registered by the electronic ticket distribution authentication apparatus to the electronic ticket information master; and
- (j) ~~causing the electronic ticket platform center to write performing ticket issuing processing for writing~~ the electronic ticket information concerning a plurality of electronic tickets for attending the event into the information storage chip based on the ticket issuing information by performing ticket issuing processing; and by the electronic ticket platform center;
- (k) causing the electronic ticket platform center to:

 - (i) assign at least one of the plurality of electronic tickets from the information storage chip to at least one other information storage chip; and
 - (ii) in response to said at least one of the plurality of electronic tickets being assigned, delete or nullify the at least one ticket from the information storage chip.

Claim 30 (currently amended): The electronic ticket management method of claim 29, wherein the seller information;

- (a) authorizes a plurality of electronic ticket distribution authentication apparatuses; and
- (b) includes the number of electronic tickets to be handled by each of the plurality of electronic ticket distribution authentication apparatuses.

Claim 31 (currently amended): The electronic ticket management method of claim 29, which includes distributing wherein the information storage chip ~~is distributed~~ as a membership card according to a membership registration via the electronic ticket distribution authentication apparatus.

Claim 32 (currently amended): The electronic ticket management method of claim 29, which includes providing wherein a predetermined time period is provided between the distribution authentication processing performed by the electronic ticket distribution authentication apparatus and the ticket issuing processing performed by the electronic ticket platform center.

Claim 33 (currently amended): The electronic ticket management method of claim 29, which includes:

- (a) sending wherein the request to distribute the electronic ticket information from the user; is sent and
- (b) causing the electronic ticket platform center to perform the ticket issuing processing is performed by the electronic ticket platform center via a network.

Claim 34 (currently amended): The electronic ticket management method of claim 29, which includes: wherein an electronic ticket information distribution store terminal is provided, and

- (a) sending the request to distribute the electronic ticket information from the user; is sent and
- (b) causing the electronic ticket platform center to perform the ticket issuing processing is performed by the electronic ticket platform center via an electronic ticket information distribution store terminal.

Claim 35 (currently amended): The electronic ticket management method of claim 29, which includes causing the electronic ticket platform center to require wherein authentication processing by the electronic ticket platform center is required when the electronic ticket information is written into the information storage chip.

Claim 36 (withdrawn): An electronic ticket assignment apparatus for controlling a reading/writing operation of electronic ticket information from and into an information storage chip of a customer in which a plurality of items of the electronic ticket information are stored, the electronic ticket information being used for authenticating a right to attend an event in correspondence with event information unique to each event, wherein the information storage chip of an assignor sends an assignment request to the electronic ticket assignment apparatus by specifying ID information of the information storage chip of an assignee and the electronic ticket information to be assigned, and the electronic ticket assignment apparatus performs an assignment operation by writing the electronic ticket information to be assigned into the information storage chip of the assignee in response to the assignment request and by deleting the assigned electronic ticket information from the information storage chip of the assignor.

Claim 37 (withdrawn): An electronic ticket assignment apparatus according to claim 36, wherein the electronic ticket assignment apparatus includes an electronic ticket platform center which authenticates a writing/deleting operation of the electronic ticket information, and a reader/writer for reading and writing the electronic ticket information from and into the information storage chip; and

wherein the assignment request and the assignment operation are performed via a network.

Claim 38 (withdrawn): An electronic ticket assignment apparatus according to claim 36, wherein the electronic ticket assignment apparatus comprises an information storage chip reader/writer having a right to authenticate a writing/deleting operation of the electronic ticket information.

Claim 39 (withdrawn): An electronic ticket assignment apparatus according to claim 36, wherein a predetermined time period is provided between the assignment request and the assignment operation.

Claim 40 (withdrawn): An electronic ticket assignment apparatus according to claim 36 wherein the electronic ticket assignment apparatus further includes at least one memory device storing executable instructions that when executed by one or more processors cause the electronic ticket assignment apparatus to perform at least one reading/writing operation of electronic ticket information from and into an information storage chip.

Claim 41-60 (canceled).

Claim 61 (withdrawn): An electronic ticket information distribution store terminal according to claim 19, wherein the plurality of electronic tickets written to the storage chip correspond to a plurality of consecutive seats for the same event.

Claim 62 (previously presented): The electronic ticket management method of claim 29, wherein the plurality of electronic tickets written to the storage chip correspond to a plurality of consecutive seats for the same event.

Claim 63 (withdrawn): An electronic ticket assignment apparatus according to claim 36, wherein the assignor is a first user having an information storage chip and the assignee is a second user having an information storage chip, and the assignment of electronic ticket information is from the first user to the second user.
